

Vehicle Maintenance  
Course Profile

Seat Time

1 - 2 hours, self-paced

Course Audience

Any automotive service professional requiring additional information and training on automotive battery service and maintenance

Course Description

This course will introduce you to the basics of automotive batteries, the tools and equipment used to test and service batteries, battery testing procedures, and battery service operations. You will learn how a battery works, the right tools and safety procedures involved in battery service, as well as how to test, remove, charge and install a battery.

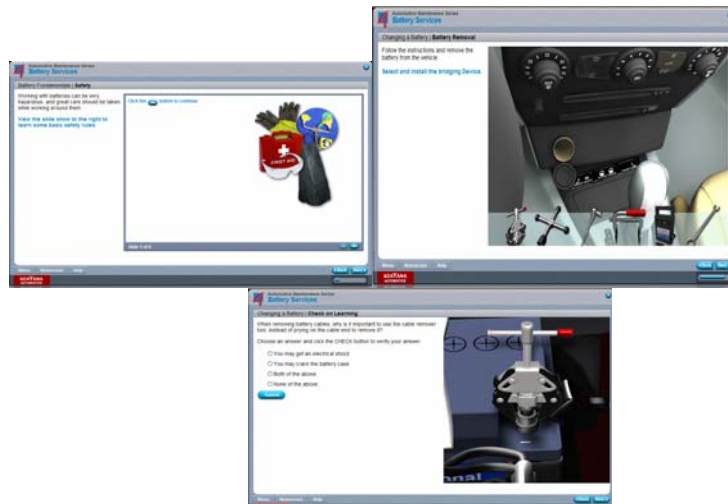

Course Topics

- Battery Fundamentals
- Battery Testing
- Changing a Battery

Course Objectives

In this course, users will learn to:

- Describe proper safety techniques when working with vehicle batteries
- Understand battery construction and operation
- Identify and properly use battery service tools
- Perform an efficient and accurate visual inspection
- Perform battery tests with the ED-18, inTELLECT and Micro 500 battery testers, as well as the load tester
- Properly perform a battery removal
- Properly charge a battery with a battery charger
- Properly perform a battery installation

Vehicle Maintenance  
*Course Profile*

**Training Outcomes**

- Provides an effective training message that reinforces consistent and accurate battery service processes and procedures
- Increases the quality of battery service
- Improves productivity of new and existing technicians performing vehicle maintenance

**Course Features**

- Global navigation
- Practice pages with multiple choice, drag 'n drop, true/false
- Interactive and animated content pages
- Glossary and resource links
- Slide shows
- Final Assessment

**Pricing Options**
